Springfield, MO 65802

FAX (417) 891-4399

Dear Mr. Bates:

This letter is in response to the recent complaint investigation conducted at your fork truck service facility located in western Springfield. The complainant alleged the disposal of waste antifreeze into the sanitary sewerage system and the improper storage of hazardous wastes.

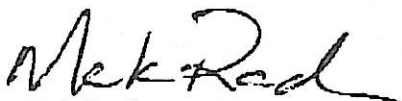

Your facility appears to conduct routine service, maintenance and repair of fork truck units. Wastes generated during these activities include used oils, antifreezes, batteries, paint wastes and a parts washing unit. Batteries are provided to the Doe Run Company for smelting and the remainder managed through Safety-Kleen Corporation. In addition to these wastes, Safety-Kleen Corporation pumps floor sumps for disposal.

Your facility would be considered a conditionally exempt small quantity generator of hazardous wastes. You are not registered with the state as a generator and are not required to maintain registration until you generate a quantity of 220 pounds of hazardous waste either in one month or at any one time.

No violations were observed during this investigation. Should you have any questions regarding this letter, please advise.

Sincerely,

SOUTHWEST REGIONAL OFFICE

Mark Rader
Environmental Specialist
